Profile Summary

I'm Artin, a passionate and creative front-end developer born in 2007, based in the dynamic city of Tehran. I stepped into the world of web development two years ago, and since then, I've been on an exciting journey of turning ideas into beautiful, functional digital experiences. With a sharp eye for design and an obsession with clean, efficient code, I thrive on challenges that let me push boundaries and grow. I'm deeply committed to writing maintainable, high-quality code and continuously learning the latest technologies in the ever-evolving front-end world. Whether it's crafting pixel-perfect UIs or collaborating within a team to bring complex ideas to life, I bring energy, precision, and passion to every project I touch. If you're searching for someone who codes like an engineer and thinks like an artist—let's connect.

☕ Turning coffee into code.

💡 Always learning, always building.

Work Experience

December 2023 - October 2024

Front End Developer

Aseman Soye Parsian

Tehran, Iran

Tasks and Achievements

- Developed and maintained scalable React.js and Next.js applications.
- Collaborated in agile environments and participated in code reviews.
- Focused on performance, accessibility, and cross-browser compatibility.
- Transformed Figma designs into clean, responsive UI components.

January 2025 - May 2025

Front End Developer

Moonrise RolePlay

Tehran, Iran

Tasks and Achievements

Designed and built the complete front-end of the server's interface.
Created interactive menus, HUDs, and in-game panels using HTML/CSS/JS.
Maintained code modularity and scalability for future feature integration.Worked closely with server admins and game designers to align UI with gameplay.

**June 2025 - Present**

Frontend Team Lead

Kiasho Knowledge-Based Company

Tehran, Iran

Tasks and Achievements

Currently leading the frontend team in developing advanced technology projects including a sophisticated messaging platform and AI-based applications. Responsible for coordinating the team, designing scalable and maintainable frontend architectures, and ensuring high-quality user experiences across all products.

Skills

JavaScript   TypeScript   Node.js   React.js   Next.js   Tailwind Css   Bootstrap   Responsive Design

Figma   Git   GitHub   Css 3   Html 5   Postman   Vercel   Docker

Projects

Ripaz

Ripaz is an ongoing GitHub project aimed at creating a platform specifically for Iranian developers. The project is still under development and aims to provide a tailored experience for the Iranian coding community.

International Legal Advisor

A comprehensive website offering international legal consulting services, featuring an AI-powered chatbot for instant support. The project includes a fully completed admin panel with content management, a small ticketing system, article publishing, and all essential features for a full-fledged legal advisory platform.

Art Coin

In the Art Coin Airdrop project, I developed a creative platform inspired by Telegram-style airdrops. The project was designed to showcase my skills in front-end development, UI design, and building interactive user experiences.

Art Coin is more than just an airdrop – it's a full-featured demo project that includes user interaction, referral systems, data encryption, and responsive design to demonstrate my ability to build engaging and functional applications.

Anonyx

Anonyx is a fun-oriented platform offering a variety of entertainment tools, including an SMS bomber for playful and anonymous interactions. The project focuses on delivering a smooth and modern user interface while ensuring usability and responsiveness. I was in charge of developing the entire frontend, crafting an engaging UI that aligns with the platform's humorous and interactive theme.
